Executive Summary

On Oct. 9th, 2021, the Weetwo token was created, as a cryptocurrency-based movement on a mission. Weetwo inc. the for-profit company manages the cryptocurrency, business functions, and owns all intellectual property. Weetwo Cares Foundation is a self-perpetuating charity funded by both the Weetwo Token and donations; set up to aid all animals in need of costly medical treatments. An additional marketing company wholly owned, operates all marketing functions for both the for-profit and the non-profit businesses. This group of entities is established to provide two fronts. The for-profit company operates a liquidified stabilized cryptocurrency. The non-profit provides direct payment to veterinarians, and other providers. Our token holders directly contribute to the charity via a small fee extracted from each transaction. In return they enjoy an appreciating asset that has already gone a long way in creating the financial security that so many lack.

We've created this worldwide movement not only to help our pets, but for our fellow people as well. Looking forward, we will have a physical global presence in every nation possible.

We've established a great team & have only just begun presenting Weetwo to the world, one community at a time. Please note that we're eight months old & have already established our cryptocurrency, opened corporate headquarters, formalized our branding, and assisted nine animals. This sets us aside from all others. We've already reached the hearts in communities around the globe. In the coming months Weetwo will be a well-known presence.

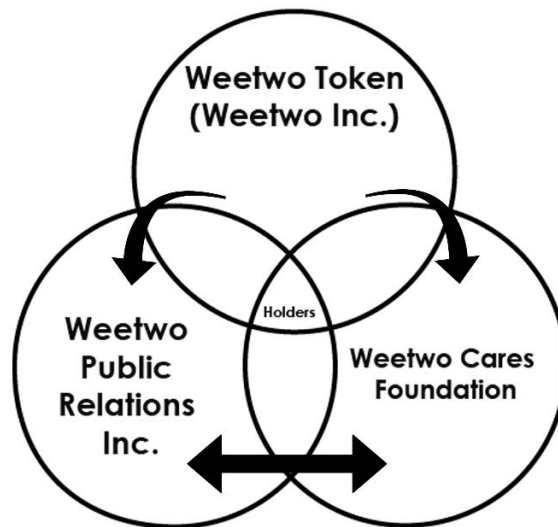

Our team consists of extremely talented people such as:

Our CEO Delano Steinacker who's a motivational entrepreneurial leader. Our President Mark Gibbs, a proverbial jack of all trades, is purpose driven. Bryan Gallant our CTO has decades of complex global IT infrastructure and cloud services. Charity Liaison Melissa Steinacker is dedicated to helping as many pets as is possible. There are many others in Team Weetwo that continue working tirelessly. These people are of the highest integrity. Together & with the backing of our amazing community, Weetwo will do precisely what we've set out to do.

Abstract

Weetwo is a self-deflationary Binance smart chain (BNB) smart contract. We're the token that makes you money while establishing a self-perpetuating charity to aid all animals in need of costly surgeries. Our primary goal is to help prevent horrible tragedies from happening to pet parents. In the memory of Weetwo, we intend to sponsor as many rescues as possible so that this doesn't have to happen to other families. Weetwo is here to help.

Team Weetwo operates as cohesive group of three organizations working together to promote and operate Weetwo as a Token and charitable organization.

As Weetwo tokens are purchased, sold and transferred, a low 4.2% slippage is observed with each transaction. Within this slippage, 2% is redistributed to all current Weetwo holders as frictionless rewards (also referred to as reflections) based on the current number of tokens held in an individual wallet. An additional 2% is allocated to Weetwo's liquidity pools and subsequently locked and burned at pre-defined intervals. The final 0.2% percent is consumed by the Binance Network itself as a transaction fee.

Within the 2% redistribution of tokens, Weetwo's Charitable organization receives its funding for surgeries by maintaining a cryptocurrency wallet with a large number of tokens that entitles them to those funds. However, the wallet itself is not available to the Charity as funds directly, only the residual gains from the reflections.

Safe Harbor Statement

(Our forward-looking statement)

This document, as well as the website, and other media platforms, may contain forward-looking statements that involve risks, uncertainties, and assumptions. All statements other than statements of historical fact could be deemed forward-looking statements, including any projections of revenues, gross margins, earnings, or other financial items; statements regarding strategies or plans for future operations; statements concerning new features, enhancements, or upgrades to our existing applications or plans for future applications; statements relating to the expected performance or benefits of our token(s); statements about current or future economic conditions; and any other statements of expectation or belief. Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks, and changes in circumstances that are difficult to predict and many of which are outside of our control. Our actual results and financial condition may differ materially from those indicated in the forward-looking statements, and therefore you should not rely on any forward-looking statements that we may make.

The risks and uncertainties referred to above include, but are not limited to, our history of losses and expectations as to future losses, limited operating history, competition, management of growth, development of the market for enterprise cloud computing, market acceptance of our applications, breaches of our security measures, compliance with global laws and regulations, risks associated with maintaining a global business and global economic conditions, fluctuations in our operating results, interruptions or delays in the provision of our services, and risks associated with tokens to customers.

Team Weetwo in addition to any subsidiaries, assume no obligation for, and does not intend to update, any forward-looking statements.

Any unreleased services, features, functionality, or enhancements referenced in Weetwo's document(s), and/or roadmap(s), and/or blog(s), and/or website, and/or press release(s), and/or public statement(s) that are not currently available are subject to change at Weetwo's sole discretion and may not be delivered as planned, or even at all; as there are outside variables which affect Weetwo's business decisions and plans that are out of our direct control. Customers who take advantage of Weetwo's services and/or Weetwo's tokens should make their decisions based upon features and functions that are currently available, and through their own due diligence review, including seeking their own separate investment advisor advice and/or their own self chosen separate legal counsel advice.
